

# Air University Islamabad Department of Computer Science

## LAB-3

**SUBMITTED** 16 February, 2026

**Web Technologies Lab - Sir. Mohabbat Ali**

<b>Name:</b> Imad Khan	<b>ID:</b> 2500623
------------------------	--------------------

### Lab Objectives

After completing this lab, students will be able to: - Understand the basic structure of an HTML document - Integrate Bootstrap into an HTML page - Use Bootstrap grid system and components - Design responsive web pages with minimal custom CSS

# LAB ACTIVITY

Internet connection (for Bootstrap CDN)

## Activity 1:

### Basic Bootstrap Page

#### Objective

Create a simple web page using Bootstrap.

#### Problem Statement

Design a webpage with a heading, paragraph, and list using Bootstrap styling.

#### Solution

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Bootstrap Basics</title>
    <link
        href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.2/dist/css/bootstrap.min.css"
        rel="stylesheet">
</head>
<body>
    <div class="container mt-4">
        <h1 class="text-primary text-center">Welcome to Bootstrap</h1>
        <p class="lead">This page is styled using Bootstrap classes.</p>
        <h4>My Favorite Subjects</h4>
        <ul class="list-group">
            <li class="list-group-item">Programming Fundamentals</li>
            <li class="list-group-item">Database Systems</li>
            <li class="list-group-item">Web Development</li>
        </ul>
    </div>
</body>
</html>
```

## OUTPUT

### Welcome to Bootstrap

This page is styled using Bootstrap classes.

#### My Favorite Subjects

Programming Fundamentals
Database Systems
Web Development

## Explanation

- Bootstrap CDN is linked in the <head> section
- Container provides fixed-width responsive layout
- List-group is used for styled lists

## Activity 2:

### Bootstrap Grid and Card Objective

Use Bootstrap grid system and card component.

### Problem Statement

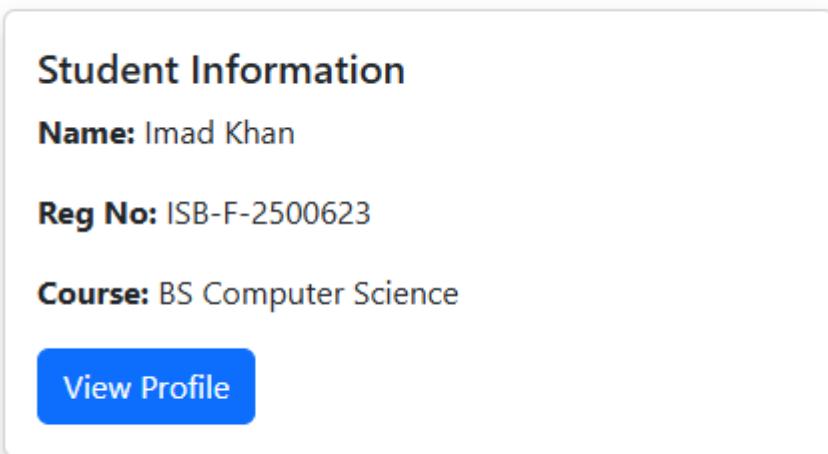

Create a responsive student card using Bootstrap.

### Solution:

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <title>Bootstrap Card</title>
    <link
        href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.2/dist/css/bootstrap.min.css"
        rel="stylesheet">
</head>
<body>
    <div class="container mt-5">
        <div class="row justify-content-center">
            <div class="col-md-4">
                <div class="card shadow">
                    <div class="card-body">
                        <h5 class="card-title">Student Information</h5>
                        <p class="card-text"><strong>Name:</strong> Ali
                            Ahmed</p>
                    </div>
                </div>
            </div>
        </div>
    </div>
</body>
```

```
        <p class="card-text"><strong>Reg No:</strong> 21-CS-  
001</p>  
        <p class="card-text"><strong>Course:</strong> BS  
Computer Science</p>  
        <a href="#" class="btn btn-primary">View Profile</a>  
    </div>  
</div>  
</div>  
</div>  
</div>  
</div>  
</body>  
</html>
```

## OUTPUT

## Explanation

- row and col-md-4 create responsive layout
- card component displays structured information
- btn btn-primary styles the button

# TASK

## Task 1

Create a Bootstrap-based webpage that includes:

- Your name as a heading
- A short introduction paragraph
- A Bootstrap-styled list of hobbies

**Code:**

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>My Bootstrap Page</title>
  <!-- Bootstrap CDN -->
  <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css" rel="stylesheet">
</head>
<body>
  <div class="container mt-5">
    <!-- Heading with your name -->
    <h1 class="text-primary">John Smith</h1>

    <!-- Introduction paragraph -->
    <p class="lead mt-3">
      Hello! I'm a web developer passionate about creating beautiful and functional websites.
      I enjoy learning new technologies and working on creative projects.
    </p>

    <!-- Bootstrap-styled list of hobbies -->
    <h3 class="mt-4">My Hobbies</h3>
    <ul class="list-group mt-3">
      <li class="list-group-item">Reading books</li>
      <li class="list-group-item">Playing guitar</li>
      <li class="list-group-item">Photography</li>
      <li class="list-group-item">Hiking</li>
      <li class="list-group-item">Coding</li>
    </ul>
  </div>

  <!-- Bootstrap JS Bundle -->
  <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/js/bootstrap.bundle.min.js"></script>
</body>
</html>
```

## OUTPUT

### Imad Khan

Hello! I'm a web developer passionate about creating beautiful and functional websites. I enjoy learning new technologies and working on creative projects.

#### My Hobbies

Reading books
Playing guitar
Photography
Hiking
Coding

## Explanation

This task requires building a simple personal webpage using Bootstrap framework. You'll need to link the Bootstrap CDN in the head section, use a container for proper layout spacing, add a heading tag for your name, write a paragraph with your introduction, and create a list using Bootstrap's list-group classes to display your hobbies with styled formatting. The Bootstrap classes ensure the page is responsive and visually appealing across different screen sizes.

## Task 2

Design a responsive page using Bootstrap grid system: - Use at least two columns - Display content side-by-side on large screens - Stack content on small screens

### Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-
scale=1.0">
    <title>Responsive Grid Layout</title>
    <!-- Bootstrap CDN -->
    <link
        href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css" rel="stylesheet">
</head>
<body>
    <div class="container mt-5">
        <h1 class="text-center mb-4">Responsive Grid Layout</h1>

        <div class="row">
            <!-- First Column -->
            <div class="col-lg-6 col-md-6 col-sm-12 mb-3">
                <div class="card">
                    <div class="card-body">
                        <h3 class="card-title">Column 1</h3>
                        <p class="card-text">
                            This is the first column. On large
                            screens, this content appears side-by-side
                            with the second column. On small
                            screens, it stacks on top.
                        </p>
                    </div>
                </div>
            </div>

            <!-- Second Column -->
            <div class="col-lg-6 col-md-6 col-sm-12 mb-3">
                <div class="card">
                    <div class="card-body">
                        <h3 class="card-title">Column 2</h3>
                        <p class="card-text">
                            This is the second column. The Bootstrap
                            grid system automatically adjusts
                            the layout based on screen size for
                            optimal viewing experience.
                        </p>
                    </div>
                </div>
            </div>
        </div>
    </div>
</body>
```

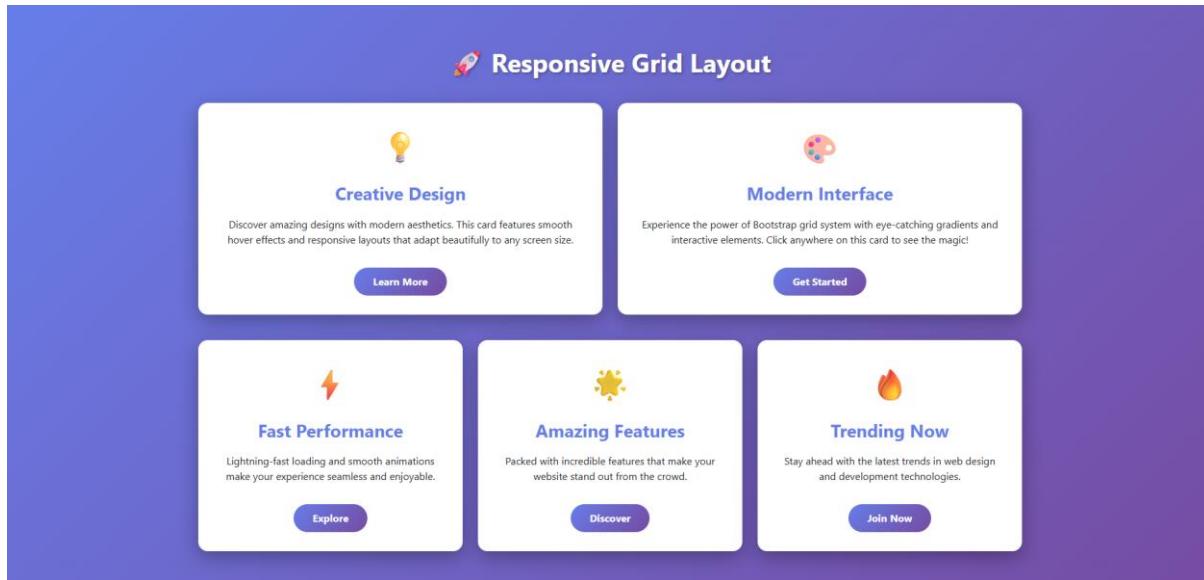

```

        </div>
    </div>
</div>

<!-- Bootstrap JS Bundle -->
<script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/js/bootstrap.bundle.min.js"></script>
</body>
</html>

```

## OUTPUT

## Explanation:

### HTML Structure:

- Bootstrap 5 framework with container, rows, and columns
- Five clickable cards with icons, titles, text, and buttons

### CSS Styling:

- Background:** Purple gradient covering full screen
- Cards:** Rounded corners, shadow effects, clickable cursor
- Hover Effects:** Cards lift up 10px with increased shadow
- Buttons:** Gradient style with rounded pill shape, scales up on hover
- Colors:** Purple theme (#667eea, #764ba2) throughout

### Bootstrap Grid:

- `col-lg-6` = 2 columns side-by-side on large screens
- `col-lg-4` = 3 columns side-by-side on large screens
- `col-sm-12` = Full width stacked on small screens

- g-4 = spacing between columns

### **JavaScript:**

- onclick="alert()" makes entire card clickable with popup message

### **Responsive:**

- Large screens: side-by-side layout
- Small screens: stacked vertically

## **Task 3**

Create a Student Profile Card using Bootstrap that includes: - Student name - Registration number - Course name - Use Bootstrap card and button components.

### **Code:**

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-
scale=1.0">
    <title>Student Profile Card</title>
    <!-- Bootstrap CDN -->
    <link
    href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.
min.css" rel="stylesheet">
    <style>
        body {
            background: linear-gradient(135deg, #6a11cb 0%, #2575fc
100%);
            min-height: 100vh;
            display: flex;
            align-items: center;
            justify-content: center;
            padding: 20px;
        }
        .profile-card {
            border: none;
            border-radius: 20px;
            box-shadow: 0 15px 35px rgba(0,0,0,0.3);
            max-width: 400px;
            overflow: hidden;
        }
        .card-header {
            background: linear-gradient(135deg, #6a11cb 0%, #2575fc
100%);
```

```
        color: white;
        padding: 30px;
        text-align: center;
        border: none;
    }
.profile-img {
    width: 120px;
    height: 120px;
    border-radius: 50%;
    border: 5px solid white;
    margin: 0 auto;
    background: white;
    display: flex;
    align-items: center;
    justify-content: center;
    font-size: 50px;
}
.card-body {
    padding: 30px;
}
.info-label {
    font-weight: bold;
    color: #6a11cb;
    margin-bottom: 5px;
}
.info-value {
    color: #555;
    margin-bottom: 20px;
    padding: 10px;
    background: #f8f9fa;
    border-radius: 8px;
}
.btn-custom {
    background: linear-gradient(135deg, #6a11cb 0%, #2575fc
100%);
    border: none;
    color: white;
    padding: 12px;
    border-radius: 10px;
    font-weight: bold;
    width: 100%;
    transition: transform 0.3s ease;
}
.btn-custom:hover {
    transform: scale(1.05);
    color: white;
}
</style>
</head>
<body>
    <div class="card profile-card">
        <!-- Card Header -->
        <div class="card-header">
            <div class="profile-img"> </div>
            <h3 class="mt-3 mb-0">Student Profile</h3>
        
```

```

        </div>

        <!-- Card Body -->
        <div class="card-body">
            <!-- Student Name -->
            <div class="info-label">Student Name:</div>
            <div class="info-value">Ahmed Ali Khan</div>

            <!-- Registration Number -->
            <div class="info-label">Registration Number:</div>
            <div class="info-value">2024-CS-001</div>

            <!-- Course Name -->
            <div class="info-label">Course Name:</div>
            <div class="info-value">Bachelor of Computer
Science</div>

            <!-- Buttons -->
            <button class="btn btn-custom mt-3">View
Details</button>
            <button class="btn btn-outline-primary mt-2 w-100">Edit
Profile</button>
        </div>
    </div>

    <!-- Bootstrap JS Bundle -->
    <script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/js/bootstrap.bundle.min.js"></script>
</body>
</html>

```

### **Explanation:**

- **Card Component:** Uses Bootstrap `card`, `card-header`, and `card-body` for structure
- **Student Info:** Displays name, registration number, and course name in styled sections
- **Profile Icon:** Student emoji () represents profile picture
- **Buttons:** Two Bootstrap buttons - primary gradient and outlined style
- **Styling:** Blue gradient background, rounded corners, shadow effects
- **Responsive:** Centers card on screen, adapts to all device sizes
- **Layout:** Clean, organized information with labels and values

## Task 3

Create a Student Profile Card using Bootstrap that includes: - Student name - Registration number - Course name - Use Bootstrap card and button components.

### Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Student ID Card</title>
    <!-- Bootstrap CDN -->
    <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css" rel="stylesheet">
    <style>
        body {
            background: #e8eef3;
            min-height: 100vh;
            display: flex;
            align-items: center;
            justify-content: center;
            padding: 20px;
        }
        .id-card {
            width: 450px;
            background: white;
            border-radius: 15px;
            overflow: hidden;
            box-shadow: 0 10px 30px rgba(0,0,0,0.2);
            border: 3px solid #1e3a8a;
            display: flex;
        }
        .side-strip {
            width: 60px;
            background: #1e3a8a;
            display: flex;
            align-items: center;
            justify-content: center;
            color: white;
            font-weight: bold;
            font-size: 16px;
            writing-mode: vertical-rl;
            text-orientation: mixed;
            letter-spacing: 2px;
        }
        .card-content {
            flex: 1;
            padding: 30px;
        }
        .university-name {
            text-align: center;
            font-size: 24px;
            font-weight: bold;
            color: #1e3a8a;
        }
    </style>

```

```
        margin-bottom: 10px;
        padding-bottom: 15px;
        border-bottom: 3px solid #333;
    }
    .student-info {
        display: flex;
        justify-content: space-between;
        align-items: center;
        margin-top: 20px;
    }
    .info-section {
        flex: 1;
    }
    .student-name {
        font-size: 28px;
        font-weight: bold;
        color: #1e3a8a;
        margin-bottom: 10px;
    }
    .student-details {
        font-size: 15px;
        color: #333;
        line-height: 1.8;
    }
    .profile-pic {
        width: 100px;
        height: 100px;
        border-radius: 50%;
        border: 3px solid #1e3a8a;
        overflow: hidden;
        background: #e0e7ff;
        display: flex;
        align-items: center;
        justify-content: center;
        font-size: 60px;
        margin-left: 20px;
    }

```

</style>

```
</head>
<body>
    <div class="id-card">
        <!-- Side Strip -->
        <div class="side-strip">
            Evening Shift
        </div>

        <!-- Card Content -->
        <div class="card-content">
            <!-- University Name -->
            <div class="university-name">
                Air University Islamabad
            </div>

            <!-- Student Information -->
            <div class="student-info">
                <div class="info-section">
                    <div class="student-name">Imad Khan</div>
                    <div class="student-details">
                        <div><strong>ISB-F-2500623</strong></div>
                        <div><strong>ADSCS-F-25-A-1280</strong></div>
                    </div>
                </div>
            </div>
        </div>
    </div>
</body>

```

```

        </div>

        <!-- Profile Picture -->
        <div class="profile-pic">
            <img alt="Placeholder for profile picture" data-bbox="325 145 365 160" />
        </div>
    </div>
</div>

<!-- Bootstrap JS Bundle -->
<script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/js/bootstrap.bundle.min.js"></script>
</body>
</html>

```

## OUTPUT

### Explanation:

- **Layout:** Uses flexbox with side strip and main content area
- **Side Strip:** Blue vertical bar with "Evening Shift" text written vertically
- **University Header:** Centered title with bottom border line
- **Student Info:** Name displayed large and bold, registration numbers below
- **Profile Picture:** Circular image placeholder on the right side
- **Colors:** Navy blue (#1e3a8a) matching the original design
- **Border:** 3px blue border around entire card with rounded corners
- **Responsive:** Card stays centered on all screen sizes

## Task 4

Create your own Curriculum Vitae (CV) using Bootstrap.

Your CV should include:

- Full name as a main heading
- Contact information
- Education details
- Skills section using Bootstrap badges or list groups
- Short personal profile

Use Bootstrap to:

- Create a clean and responsive layout
- Apply appropriate colors and spacing
- Use cards, grid, and typography utilities

**Code:**

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Imad Khan - CV</title>
    <!-- Bootstrap CDN -->
    <link
        href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css"
        rel="stylesheet">
    <style>
        body {
            background: linear-gradient(135deg, #8e9eab 0%, #eef2f3 100%);
            min-height: 100vh;
            padding: 40px 20px;
            font-family: 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif;
        }
        .cv-container {
            max-width: 900px;
            margin: 0 auto;
            background: #e8e8e8;
            padding: 40px;
            border-radius: 15px;
            box-shadow: 0 20px 60px rgba(0,0,0,0.3);
        }
        .cv-content {
            background: white;
            border-radius: 10px;
            overflow: hidden;
            box-shadow: 0 5px 15px rgba(0,0,0,0.1);
            display: flex;
        }
        .left-sidebar {
            width: 280px;
```

```
        background: #d5d5d5;
        padding: 30px 20px;

**Imad Khan**

---

**PROFILE**

---

A motivated and detail-oriented student currently pursuing studies at Air University Islamabad, with a passion for front-end development and web technologies. Eager to apply knowledge and grow skills through real-world projects and collaboration.

---

**EDUCATION**

---

2023 - Present

**Air University Islamabad**

Currently enrolled in undergraduate program.

---

**SKILLS**

---

- Front-End Development (HTML, CSS, JavaScript)
- React.js
- Responsive Web Design
- Git & GitHub
- Bootstrap & Tailwind CSS
- Basic backend with Node.js

## Explanation:

### Layout:

- Two-column design: gray sidebar (left) + white content area (right)
- Flexbox layout for responsive structure

### Left Sidebar:

- Profile picture with circular border
- Contact details (phone, address, email)
- Professional summary points
- Language skills

### Right Content:

- Large name heading at top
- Profile section with personal description
- Education timeline with year and institution
- Skills list with bullet points

### **Styling:**

- Gray gradient background
- White content card with shadow
- Section titles with underline borders
- Clean typography and spacing
- Professional color scheme (gray, black, white)

### **Bootstrap Features:**

- Responsive grid system
- Typography utilities
- List styling
- Card components
- Spacing classes (mb, mt, padding)

**---END---**
